

THE PROJECT

In the aftermath of the Covid 19 crisis, thousands of academics around the world were forced to turn their lectures and face-to-face classes to online courses for millions of students, within a few days' notice. Thus, this Erasmus+ project came as a response to this events' turnover. It aims at preparing academics of Higher Education Institutes (HEI) to better develop and deliver their online courses, enhance learning outcomes and keep students interested and involved.

PROJECT DURATION AND PARTNERSHIP

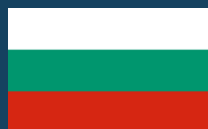

The project started in June 2021 and is ending in May 2023. The project gathers 7 partners from Europe, representing the following organisations:

- DIMITRA EDUCATION & CONSULTING

- CRES
- UNINETTUNO

- INSTITUTE FOR TRAINING OF PERSONNEL IN INTERNATIONAL ORGANIZATIONS
- UNWE

- FOLKUNIVERSITETET

- SGGW WARSAW UNIVERSITY OF LIFE SCIENCES

THE PROJECT'S INTELLECTUAL OUTPUTS

1. Comparative Study- that will identify the current needs and gaps for boosting the effectiveness of online HE learning. 2. Guide of Key Pedagogical Principles for effective Online Teaching and Learning which is a combined guide introducing educators into a methodologically effective Online class. 3. iSurvive compass for Interactive & Gamified online content Creation- is concerned with combining several parameters creating a tailor-made roadmap for the educator needs. 4. An innovative MOOC-that provides a high education course of specialization in an area where skills needs are so rapidly developing.

MULTIPLIER EVENTS

During march and april, the project partners organised a multiplier event in each country in order to present the results of the project and to show the participants the platform developed and the MOOC training course.

These were very important moments because we were able to 'test' the work done on people, so that we could assess the interest aroused.

Multiplier events are a way for the whole society to benefit from the efforts and commitment made during the project. We believe that this type of activity is essential in this day and age to create a sense of sharing with all citizens and to spread knowledge.

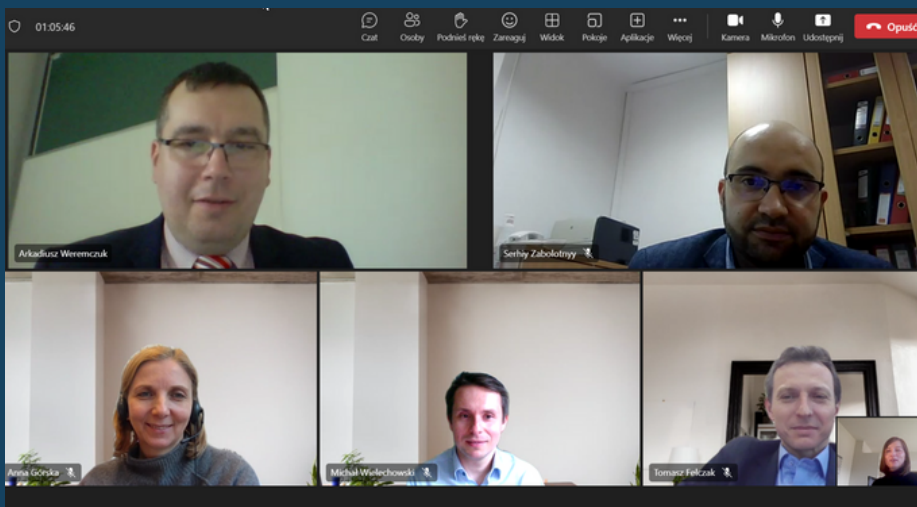

In Poland, Warsaw University of Life Sciences organized the Multiplier Event for March 31st. Here is a picture of the participants.

Uninettuno University held its Multiplier event on the 20th of April. The event was coordinated by Prof. Di Pomponio and Dr. Elisabetta Trinca.

In Bulgaria, The Institute for Training of Personnel in International Organizations (ITPIO) held its Multiplier event on 30th of March and has already carried out the piloting with some participants. This is the screenshot of the online conference where many teachers and education actors were able to test the platform and follow the MOOC training.

SGGW also piloted, in no less than four different rounds! An excellent research dissemination result!

NEXT STEPS...

During April and May, the partners will conduct pilot training with representatives of the educational world, trainers and teachers in order to further disseminate knowledge.

On the 24th of May there will be a final conference of the project. the event will take place at the Warsaw university of Life and Science – SGGW.
