## Innovative Teaching Methodologies in Hospitality Schools for Inclusive Education

## ABOUT THE PROJECT

The InTeam4IEd project aims to support teachers and tutors in dealing with developmental challenges associated with Autism Spectrum Disorder (ASD) students of post-secondary (initial) VET in the hospitality sector, as well as to assist them in acquiring expendable skills both within the education system and externally in the hospitality industry.

Inclusive education of people with Special Educational Needs (SEN) is often framed in terms of human rights or justice. Notwithstanding, the economic dimension for educating people with disabilities is also very relevant. Lack of appropriate education remains the key risk factor for poverty and exclusion of any person, whether they are disabled or not.

This project follows a follow a step-by-step methodology based on the Plan-Do-Check-Act Cycle (PDCA) to create a ground-breaking Flexible and Hybrid Educational Methodology and Tools (F.H.E.M.T.) for teachers to assist ASD students in gaining new sector-specific competencies, and also an educational application, which will integrate the F.H.E.M.T., and the related operational guidelines for teachers, students and families.

## 4th TPM – GIULIANOVA, ITALY

On the 6th and 7th of June, the beautiful town of Giulianova, Italy, hosted our last Transnational Partner Meeting. The agenda was packed with productive discussions and collaborative sessions. We kicked off with a welcome from our hosts at I.I.S. Crocetti-Cerulli, followed by an in-depth review of our app. A significant highlight was the testing and feedback session for our chatbot, aimed at enhancing the educational experience for ASD students. Participants also shared insights from national info-days, showcasing the project's reach and impact. The meeting concluded with a dissemination plan to ensure the project's results are widely shared and utilized. The atmosphere was one of enthusiasm and cooperation, culminating in a social dinner where ideas and experiences were exchanged in a more informal setting.

## CHATBOT

We are thrilled to announce that our InTeaM4IEd chatbot is now up and running! This innovative tool is currently undergoing internal testing and is set to revolutionize the way we support our ASD students. Designed to enhance communication and provide personalized assistance, the chatbot will be an invaluable resource for both students and teachers. We are excited about its potential and look forward to sharing it with our broader community soon.

## INTEAM4IED EXTENTION

We are happy to announce that our project has been granted a three-month extension. Originally set to conclude in July, the project will now continue until the end of October 2024. This additional time will allow us to further refine our tools and ensure the highest quality outcomes.
